NAO-2014-1391/15-V0075 (York River)

Commander Jed R. Boba, P.E.
U.S. Coast Guard Training Center Yorktown
Yorktown, Virginia 23690

Dear Commander Boba:

This letter is in reference to your request for modification of The Department of Army Permit Number NAO-2014-1391/15-V0075 for the dredging and associated disposal of dredged material at the United States Coast Guard Training Center in Yorktown, Virginia. The applicant proposes to dredge approximately 89,257 cubic yards of material to a maximum depth of -10 feet below mean low water from approximately 296,208 square feet of subaqueous bottom within Wormley Creek and the York River. The project will realign the existing channel where Wormley Creek meets the York River, and create a new channel to the existing boat ramp at the Coast Guard Training Center Yorktown. The dredged material from the channel will be removed by mechanical or hydraulic cutterhead dredge methods during the initial and future maintenance dredging cycles. The sandy dredged material from the entrance of the channel will be used as beach nourishment along the York River shoreline of the Coast Guard Training Center York, and the fine dredge material will be transported by bottom dump scow to the Wolfrap Alternate Placement Site within the Chesapeake Bay. In addition, the applicant requests authorization for the construction of a temporary access road to be used for the offloading and transportation of the sandy dredged material to be placed along the York River shoreline. The proposed access road will result in temporary impacts to 118,000 square feet of wetlands and/or waters, and those areas will be restored to pre-existing conditions upon completion of the project.

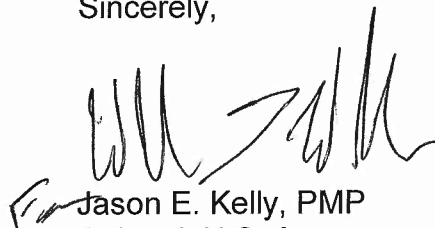

In accordance with your request for modification on February 15, 2017 your Department of the Army Permit, issued on June 8, 2016, is hereby modified to allow for the proposed impacts to wetlands and waters of the U.S., as shown on the enclosed drawings entitled "U.S. Coast Guard Training Facilities, Wormley Creek, Plans for Construction," dated July 31, 2014 and date stamped as received by our office on February 15, 2017 (attached). All other conditions of the original permit remain unchanged. Please be advised that all conditions of the original and modified Virginia Water Protection Permit become conditions of this authorization.

-2-

Enclosed is a "compliance certification" form, which must be signed and returned within 30 days of completion of the project. Your signature on this form certifies that you have completed the work in accordance with the terms and conditions of this permit.

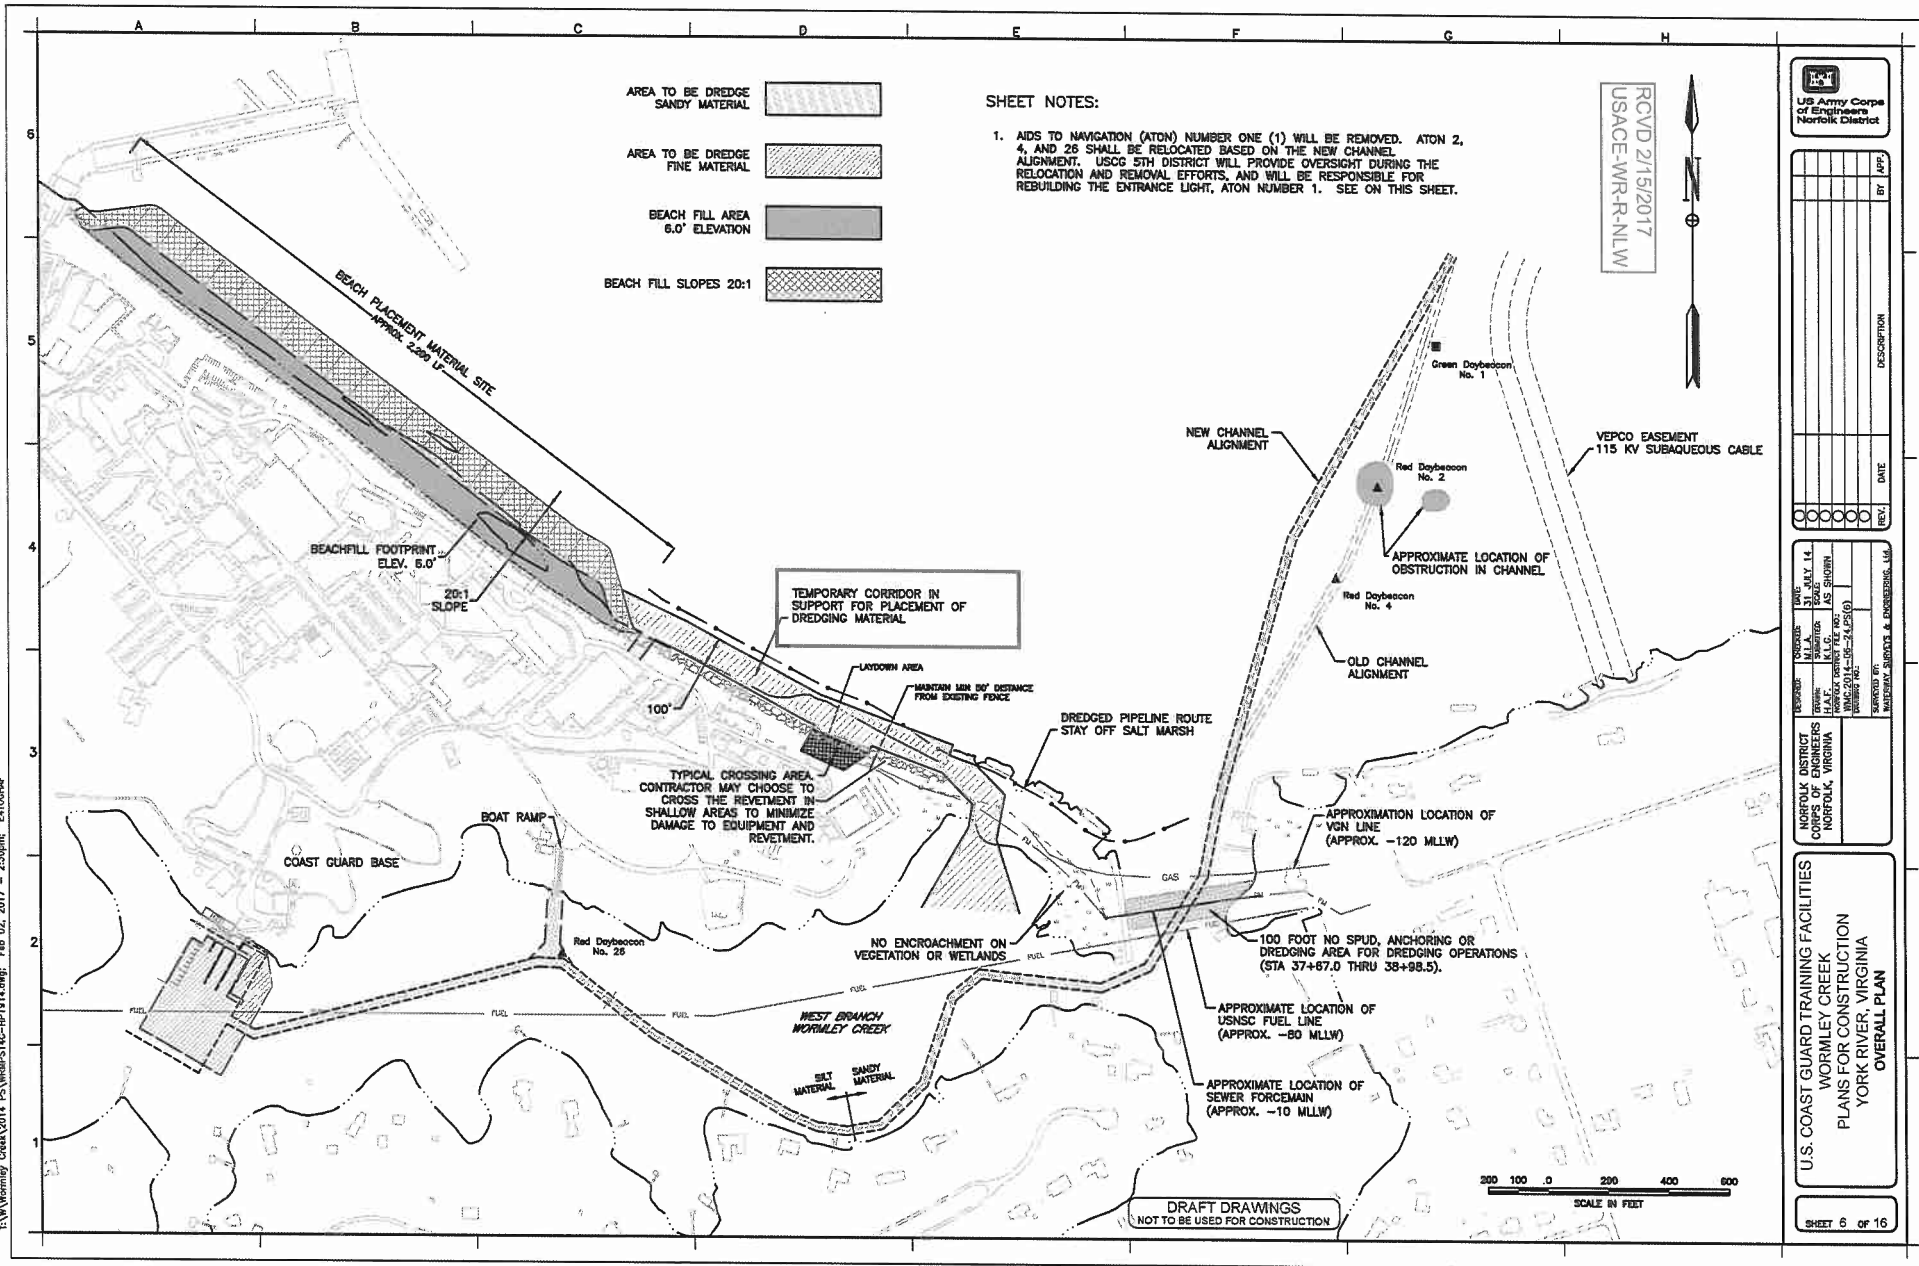

Please obtain all necessary State and Local authorizations for the proposed work. I am forwarding a copy of this letter to Virginia Department of Environmental Quality and Virginia Marine Resource Commission. Should you need further assistance or have any questions, please contact Ms. Nicole Woodward at (757) 201-7122 or email at nicole.l.woodward@usace.army.mil.

Sincerely,

For Jason E. Kelly, PMP
Colonel, U.S. Army
Commanding
